

### **F3 Webinar: *Emerging Trends in Alternative Feeds for Shrimp***

*Major feed companies and producers discuss emerging trends in fish-free feeds for shrimp*

The F3 – Future of Fish Feed will convene a panel of major feed companies and producers to discuss the latest trends in fishmeal and fish oil replacement for shrimp. Panelists will discuss the latest research breakthroughs, challenges, and potential for totally eliminating wild-caught feed ingredients in shrimp diets.

**The webinar will take place on Thursday, July 15, 2021 at 5 am GMT**

Shrimp consume roughly one-third of global fishmeal. Finding alternative ingredients and feeds for shrimp is critical for ocean health and for shrimp aquaculture to be sustained in the future. Shrimp farmers worldwide are vulnerable to the fluctuating prices of fishmeal while simultaneously managing evolving disease crises.

The alternative protein sector for aquafeeds is growing rapidly and new ingredients are coming to the forefront to provide more stable sources of protein for shrimp feeds while also enhancing survival and immunity.

A Q&A session with representatives from Aqua Cognoscenti, Charoen Pokphand Foods Public Company, Gold Coin Group, Grobest Group, JAPFA Group, Minh Phu AquaMekong Co. will follow panelist presentations.

This event is part of a yearlong webinar series hosted by the F3 Team. The webinars are free and open to everyone. For more information and to register, visit: [f3meeting.com/webinars](https://f3meeting.com/webinars).
